

DEFINITIONS

- **Everything** – rehabilitate all main sewers, manholes, serviceconnections, and service lines; and remove all identified building and inflow sources/defects.
- **Private Only** – rehabilitate all service connections and service lines; and remove all identified building and inflow sources/defects.
- **Public Only** – rehabilitate all main sewers and manholes.
- **Typical Comprehensive** – rehabilitate the main sewers and manholes that are contributing significant amounts of I/I; and remove all identified building and inflow sources/defects.
- **Typical Comprehensive + LL** – rehabilitate main sewers and manholes that are contributing significant amounts of I/I; remove all identified building and inflow sources/defects; and rehabilitate all service connections and lower laterals (lower service lines).
- **Control** – no rehabilitation work will occur, flow monitoring only
