RE: Notification of Field Activity
Lake Quivira Sanitary Sewer Rehabilitation

Dear Property Owner:

Johnson County Wastewater has contracted with the engineering firm of GBA to evaluate and begin the design of the rehabilitation and repair of the existing sanitary sewer on properties located in Lake Quivira. Field investigations and surveying activities may be needed on or near your property to gather topographical, geological and surface feature data that will be used in the aforementioned design. These investigations and activities will be performed by GBA and Kleinfelder, Inc.

If you have any questions or concerns about these field investigations and surveying activities, please contact Mr. Waldo Margheim of GBA at (913) 492-0400. You may also contact me at (913) 715-8684. Thank you for your cooperation.

Please note that this letter should be a signed original.

Sincerely,

Patrick Beane, P.E.
Project Manager
