creating remarkable solutions
for a higher quality of life

**Survey Activity
Lake Quivira Sanitary Sewer Rehabilitation**

Sanitary Sewer Improvements Planned for Your Neighborhood

Dear Property Owner:

Johnson County Wastewater (JCW) has started the design of a sanitary sewer project in Lake Quivira. George Butler Associates, Inc. (GBA) has been hired by JCW to conduct this design. You are receiving this letter because the design and construction of this project may affect your property. We currently estimate that approximately 150 properties in the community will be directly affected by this project. As the design progresses, those directly affected properties will be identified and the owners of those properties will receive additional correspondence that identifies the work to be performed on their property.

The Project

Existing sanitary sewers are located throughout the Lake Quivira community to provide sanitary service for residents. Many of these sewer segments are approaching the end of their useful lives and/or do not meet current design standards. To maintain and improve the level of service to its customers, JCW plans to repair and upgrade many of the sewers throughout the community.

Preliminary Schedule

The first step in making the repairs is surveying the existing features in the existing sewer alignments. The information collected will then be used to prepare rehabilitation plans. Survey activities are scheduled to begin immediately. The surveyors will be in the project area for about six weeks. Construction is tentatively scheduled to begin in mid 2009.

Please note that GBA field and survey crew members will have in their possession a signed, original letter from Johnson County Wastewater titled, "Notification of Field Activity". Please ask one of our crew members to show you the letter if you have any concerns.

Your Involvement

As the design begins, we would value your input and concerns. Knowing your concerns early in the process will allow us to respond to them during the design phase. To start, we have enclosed a request for the following information:

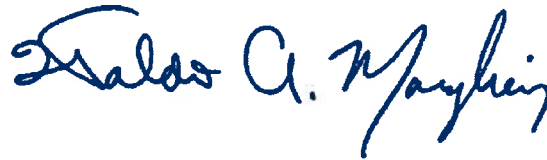

- Concerns or special issues regarding your property, and
- Information to help us contact you.

Although we will welcome comments at any time, we would be grateful for the completion of this initial request for information as soon as possible due to the schedule that JCW has set for this project. Please mail the enclosed form back to the address on the letterhead to my attention or fax the form to 913-577-8346. Or, if you prefer, email me a request for an electronic version of the form which may then be emailed back to me. My contact information is below.

As this project progresses, your continued involvement and cooperation will be requested. We look forward to working with you on this sewer project and we thank you in advance for your input. Please feel free to contact me to discuss the project; you may also contact Mr. Patrick Beane, the project manager for JCW.

Sincerely,

GEORGE BUTLER ASSOCIATES, INC.
